## OVERVIEW

Air Fantastic manufactures a variety of different machines which provide continuous sanitizing WashYourAir™ cleansing ions that wash your air. WashYourAir™ continuously emits a dry version of the liquid Hydrogen Peroxide at safe level. Hydrogen Peroxide was used to decontaminate Ebola infected areas.

This WashYourAir™ technology uses a catalytic process to derive ions from the moisture in the air. These ions neutralize odors, sanitize the air, and create a healthy living environment at the same time. This cleaning process is similar to the one we find in nature where unpleasant odors, such as road kill, garbage, and skunk spray are eliminated through oxidation. The benefits of this technology are summarized in the following sections.

### REDUCING AIRBORNE CONTAMINANTS

Test results from the West Texas A&M University prove that this process is safe and effective in reducing dangerous airborne and surface bacteria, including Staphylococcus Aureus (Staph bacteria) and the drug resistant MRSA bacteria. The tests also prove that this technology has successfully reduced airborne contaminants such as mold, fungus, and bacteria up to 99% within 72 hours. In addition, a customer performed an independent test and proved that this technology could reduced 80% of surface bacteria in just one hour.

Since the bacteria are reduced through an oxidation process and not an anti-bacterial solution, this technology reduces the possibility for germs to become immune to anti-bacterial agents through mutation.

### PROVIDING ALLERGY RELIEF

Most allergy symptoms are a result of people breathing in airborne pollen or

dust. If the exposure to airborne pollen or dust is minimized, people's allergy symptoms will gradually reduce.

Heavy and large airborne particulate contaminants such as dust, pollen, allergen, and dander can remain airborne indefinitely at certain levels due to positive static energy that repels the particulate from the ground, which is also positive. Airborne particulate contaminants can easily be observed when sunlight shines through the window in the morning. This technology produces negatively charged ions that can make these airborne particulates settle down on the floor. Lab results from the West Texas A&M University proved that up to 99% of particulates were reduced in 72 hours.

### REDUCING EXPOSURE TO HARMFUL AIRBORNE GASES

WashYourAir technology can also quickly reduce the harmful Volatile Organic Compounds (VOCs). The VOCs are actually broken down on a molecular level. Customer lab tests showed a 60% reduction of Formaldehyde in 24 hours and an 80% reduction in ammonia in one hour.

### GREEN TECHNOLOGY

WashYourAir Technology sanitizes and deodorizes your environment without using chemicals, anti-bacteria agents, synthetic deodorizers or enzymes. In addition, all of our machines are energy green friendly and require very little electricity (~15W).

If you have any question or need help choosing the right machine, please feel free to e-mail Mark Mueller at [markm@airfantastic.com](mailto:markm@airfantastic.com) or call him at (512) 892-5327.

## HOW WASHYOURAIR™ TECHNOLOGY WORKS

The heart of the Air Fantastic machines is a cell composed of an ultraviolet lamp surrounded by sequential parallel aluminum disks impregnated with a four metal catalyst. The ultraviolet energy and the white catalyst creates an environment that allows the recombination of water ( $H_2O$ ) and oxygen ( $O^2$ ) molecules to produce four ions with the main ion as Hydro-peroxide ( $H_2O_2$ ).

Similar to the liquid Hydrogen Peroxide found in brown bottles at the drug store, Hydro-peroxide is a dry airborne virtually odorless ion that has the ability to travel everywhere and can sanitize air & surface bacteria, virus, mold and fungus.

Three other oxidizing ions are also produced at the same time, including Super Oxide ion ( $O^{2-}$ ), Hydroxyl Radical ( $HO^-$ ), and Ozonide Ion ( $O^3^-$ ). Ozonide

ion is a very weak derivative of Ozone and quickly breaks down as it enters the environment. Unlike ozone generators that create noticeable high levels of ozone, the ozone measured from our residential machines at 4 feet registers at zero or is negligible.

Outdated technology with UV only lamps installed in the HVAC systems can only kill germs within 8" of the lamp. Unlike this outdated technology, our UV lamp generates sanitizing ions that can travel throughout the entire room to kill germs and bacteria.

This technology is **GREEN** friendly because it uses very little energy. Most of our machines only use approximately 15. watts. The CAP3000, CAP5000 and CAP 7000 use very little energy and can be easily installed into the HVAC duct work

### AIR FANTASTIC'S WASHYOURAIR™ FOUR ION PROCESS

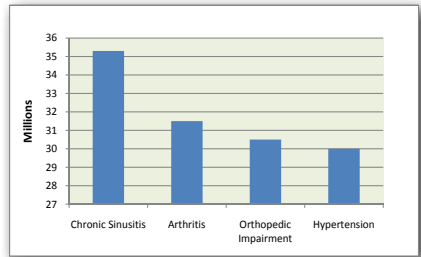

# MAYO CLINIC STUDY IMPLICATES FUNGUS AS CAUSE OF CHRONIC SINUSITIS

## Mayo Clinic Researchers found:

- Chronic sinus infections are an immune system response to fungus.

## What is Chronic Sinusitis?

- An inflammation of the membrane of the nose and sinus cavity.
- Common symptoms are runny nose, nasal congestion, loss of smell and headaches.
- Chronic inflammation leads to small growths in nasal passages (polyps).
- Its incidence has been increasing steadily over the last decade.
- One of the most chronic diseases in United States (37 million sufferers).

Common Chronic Diseases (U.S.)

## Fungi discovered as Root Cause

- Until 2003, the cause of chronic sinusitis was not known.
- “Fungus allergy was thought to be involved in less than ten percent of cases,” says Dr. Sherris.
- “Our studies indicate that, in fact, fungus is likely the cause of nearly all of these problems.
- It is not an allergic reaction, but an immune reaction.”
- With 210 patients with chronic sinusitis, they discovered fungus in 96 percent of the patients’ mucus.
- They identified a total of 40 different kinds of fungi in these patients.
- As long as fungi remain, so will the irritation.
- Researchers distinguish chronic sinusitis as sinusitis that lasts three months or longer.
- Thousands of kinds of single-cell fungi (molds and yeasts) are found everywhere in the world.
- Fungal spores (the reproductive part of the organism) become airborne like pollen.

## Antibiotics not effective

- Antibiotics and over-the-counter decongestants are widely used to treat chronic sinusitis.
- Antibiotics are not effective for chronic sinusitis because they target bacteria, not fungi.
- Some people develop allergies to fungi and many people also develop a different kind of immune system response.

## How can Air Fantastic can help?

- Air Fantastic technology helps reduce airborne microbial (mold, fungus, & bacteria) by up to 99%.
- This reduction in airborne fungus may significantly help chronic sinusitis sufferers from airborne fungi.

## SCIENTIFIC TEST DATA: REDUCE POLLEN/DUST UP TO 99%

### OVERVIEW

West Texas A&M University conducted a study to verify the reduction of airborne microbial (mold, fungal, & bacteria) and aeroallergen (pollen) with this air purification technology.

This study concluded that poor Indoor Air Quality (IAQ) not only contributes to an unhealthy environment but also hastens a building's deterioration.

According to a study described in *School Health*<sup>1</sup>, one school would have spent \$8,140 on preventative maintenance over

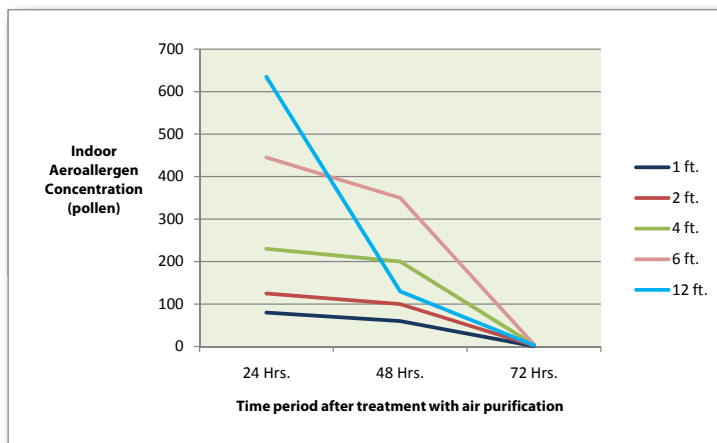

22 years by using this technology, instead of spending over \$1.5 million in repairs.

### AEROALLERGEN (POLLEN)

Aeroallergens were measured at a distance of 1 feet, 2 feet, 4 feet, 6 feet, and 12 feet from the placement of the air purifier.

Figure 1 shows the distribution of the aeroallergen count after the treatment of the air in the room after 24, 48, and 72 hours. There was almost no aeroallergen left close to the air purifier after 72 hours of treatment.

**Figure 1**  
**Distribution of Aeroallergen in**  
**Control Set with Air Purifier**

**SCIENTIFIC TEST DATA:**  
**REDUCE AIRBORNE BACTERIA/MOLD UP TO 99%**  
**MICROBIAL (MOLD, FUNGUS, AND BACTERIA)**

Petri dishes measured microbial colonies at distances of 1 feet, 2 feet, 4 feet, 6 feet, and 12 feet from the 6point of air purification before turning on air purifier. The results of the test are presented in the following figures<sup>1</sup>.

**Figure 2**  
**Number of Microbial Colonies Produced in the Control Set BEFORE**  
**Any Treatment of indoor Air with the Air Purifier**  
**(Measured at 1 ft., 2ft., and 4 ft.)**

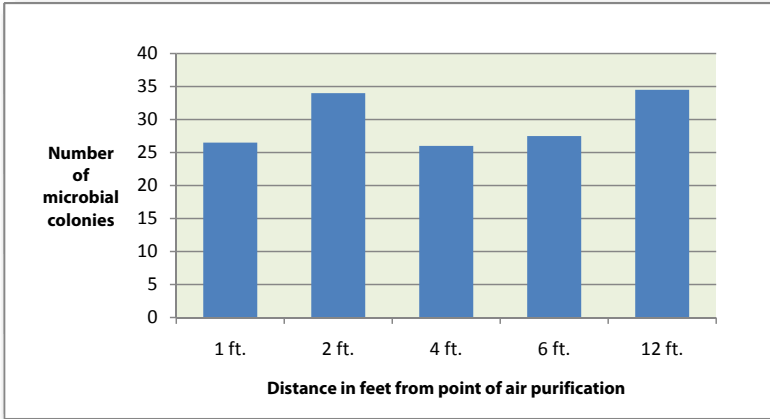

**Figure 3**

**(WITH Treatment of Air Purifier)**

## SCIENTIFIC TEST DATA: HELPS ERADICATE MRSA

MRSA is a drug-resistant Staph infection that kills more Americans each year than AIDS. A small wound looking like a spider bite can deteriorate into a serious injury and might result in death within days.

A study conducted at West Texas A&M University using our AF4000 and CAP3000 HVAC probes showed the eradication of the surface bacteria MRSA. Figure 6 shows the reduction of MRSA bacterial colonies with our AF4000 and CAP3000 HVAC probes in a controlled environment.

**CUSTOMER TESTIMONIAL**  
**SEVERE CHILD RESPIRATORY & ALLERGY PROBLEMS**

First I would just like to say Thank You. My daughter has been sick since we moved here due to allergies. I was spending close to \$300 per month in doctor bills. Since having the machine she has had a complete turn around. No more doctors! My other daughter was born with RSV & has had breathing problems for 11 years. Now with the machine, she can breathe easier & sleep through the night.

Thank you Air Fantastic, you have saved our families health.

Ginger H.  
AF3000 owner

**CUSTOMER TESTIMONIAL**  
**DOG WITH SEVERE ALLERGIES & BLEEDING SORES**

I would like to give my sincere thanks for helping my dog Molly with her skin problems. Three months ago we were at the vet every other week trying different medications for a severe skin irritation. I had not changed any cleaning supplies in my home nor were there any changes in the household environment that I could come up with. The vet put Molly on Prednisone, a cortisone medication taken orally. After two weeks on the medication the whole right side of Molly's body was bloody and raw. The vet said it could be fungus in the air or something else in the air in my home. Within three days of plugging in your air purification unit, Molly's right side scabbed up and started healing. It has now been three months and Molly's has grown her fur back and is symptom free. I feel our home is now safe for both dogs and myself. Thank you for your help.

S. Smith

**DECOMPOSITION & OLD BUILDING SMELL**

**SPARKMAN/CRANE**  
FUNERAL HOME

Air Fantastic, LLC  
4406 Eagles Landing Drive  
Austin, Tx 78735

Dear Mr. Mueller,

September 21 , 2012

Earlier this year we purchased 4 Air Fantastic 4000 units. At that time, our Funeral Home began to share a common building with our Central Care Center, where the embalming and storage of decedents is handled. With the chemicals and other odors that are associated with that area of our building we were concerned about smells circulating into the Funeral Home side of the building, where members of the public visit. In addition, our building is over 55 years old and had the stale smell of a building that age. For someone that works in the building on a daily basis, the smells described above can become natural and unnoticeable. But, I knew our money had been well spent when some of our client families would tell us how nice our building smelled, which had never happened before. We have been please with the results and would recommend the device for anyone in a similar situation.

Sincerely,

Erica Nelson  
Funeral Director

**CUSTOMER TESTIMONIAL**  
**SEVERE CHEMICAL ODOR & VOC**

B & B Body and Paint  
6518 N. Lamar  
Austin, TX 78752

To Whom It May Concerns:

I have been in the auto body repair business for over 15 year and I am always surrounded by high levels of paint fumes. Two weeks ago, Mark Mueller from Air Fantastic stopped by and informed me that the Quadruple Ion technology can quickly remove VOCs such as paint fumes. I was slightly skeptical but he allowed me try out the Plug-in unit in my small manager office (~100 sq ft). Within one hour, all traces of paint fumes and odors were totally eliminated. I am very impressed at the effectiveness of this Quadruple Ion unit. I would recommend this unit to anyone that wants to quickly remove paint fumes.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Bobby Roberts", with a stylized flourish at the end.

August 19, 2008

Mark Mueller, President  
Air Fantastic, LLC  
4406 Eagles Landing Dr.  
Austin, TX 78735

Dear Mr. Mueller:

I am writing to update you on our satisfaction with your Air Fantastic 4000 unit, which we purchased last month. As a forensic pathologist and Medical Examiner, we frequently encounter cases which have very strong odors due to decomposition. In the past we would be able to notice these odors in our main morgue room even with a very high air turnover. We installed the unit in the walk in cooler where the bodies are stored and since that time minimal odor is noted even within the cooler itself. Outside the cooler the air is now very pleasant. All of our employees have noted the vastly improved conditions. The unit is compact and highly efficient and takes up virtually no space installed high on the shelf. Elimination of pathogens such as bacteria will be important to us. The added benefit of reducing atmospheric gasses will also be an advantage as we utilize formaldehyde on a regular basis and want to minimize our exposure to this potentially dangerous chemical.

Thank you very much for your excellent products. I can obviously attest to its efficacy under the most difficult of situations.

Sincerely,

A handwritten signature in black ink, appearing to read "Gregory A. Schmunk".

Gregory A. Schmunk, MD  
Medical Examiner

## CUSTOMER TESTIMONIAL

### EXTREME CAT URINE ODOR

To whom it may concern:

We had an apartment here at Riverside Meadows that had a strong cat urine smell. This smell was so bad that the painters had to wear masks when they painted the unit.

We had the pad under the carpet pulled and the concrete treated with bleach and carpet cleaned and treated but the smell seem to be in the walls. The smell was still so bad that the cleaning crew had to wear masks. At that point I heard about Mark Mueller with Air Fantastic.

Mark Mueller persuade me to put a small QuadIon machine (Ionblaster 1000) in the apartment for 48 hours and it made a great improvement but the smell was still there so he put the large unit (Ionblaster 7000) in for another 48 hours and the smell was gone.

Today, two weeks later, the smell has not returned. This machine is much cheaper than replacing carpet and sometimes even after replacing the carpet the smell still lingers.

Air Fantastic is wonderful and I would highly recommend it to anyone suffering from strong odors that you need to get rid of.

Sincerely yours,

A handwritten signature in black ink that reads "Susan Ashford".

Susan Ashford  
Manager
