Mark Mueller
President,
Air Fantastic, LLC
4406 Eagles Landing Drive
Austin, TX 78735

Dear Mr. Mueller:

I am writing to update you on our satisfaction with your Air Fantastic 4000 unit, which we purchased last month. As a forensic pathologist and Medical Examiner, we frequently encounter cases which have very strong odors due to decomposition. In the past we would be able to notice these odors in our main morgue room even with a very high air turnover. We installed the unit in the walk in cooler where the bodies are stored and since that time minimal odor is noted even within the cooler itself. Outside the cooler the air is now very pleasant. All of our employees have noted the vastly improved conditions. The unit is compact and highly efficient and takes up virtually no space installed high on a shelf. Elimination of pathogens such as bacteria will be important to us. The added benefit of reducing atmospheric gasses will also be an advantage as we utilize formaldehyde on a regular basis and want to minimize our exposure to this potentially dangerous chemical.

Thank you very much for your excellent product. I can obviously attest to it's efficacy under the most difficult of situations.

Sincerely,

Gregory A. Schmunk, MD
Medical Examiner
